

About Us

Stablished in 1993, Plantation Tree Company has quickly set the standard for quality in field grown trees and ornamentals.

Located in central Alabama at the end of the Appalachian Plateau, our climate of moderate winters and plentiful rain combined with our deep clay loam soil provides for an unsurpassed growing environment. Premium liners from the best growers in the country are carefully planted and maintained. They are then nurtured by drip irrigation and fertigation to insure that our plants consistently meet the high standards of quality that our customers have come to expect. Plantation Tree Company is a B&B nursery with 400 acres currently in production. We grow premium quality trees and shrubs for the landscape market. We are continually updating our product mix to meet our customer needs. We pride ourselves on the quality and consistency of our plant material. We go to great lengths to insure that we have uniform heads, straight central leaders, and solid branching structure, along with superb root systems. All this combined with great attention to detail in the digging and loading process insures that you receive a premium quality tree in the best condition possible.

Thank you for making our new crapemrytle liner and container projects a success. We are continuing to expand both of these projects. Please continue to give us your input as we want to tailor these programs to your needs. We invite you to visit our nursery and view our product first hand. Just give us a call and let us know when you are coming to visit. You can see most of our product on our website at www.plantationtrees.com.

Thank you for your continued support.

Plantation Tree Company Bareroot Crapemyrtles

We are growing Crapemyrtles in the field for one year, cutting them off at the start of the second year, growing the top for a year and then barerooting them that winter to give you a one year top with a two year root system. This makes an outstanding liner for either 15 or 30 containers or to put into the field to grow to a bigger size. We will have Natchez, Muskogee, Tuscarora, Miss Francis and Miss Sandra liners available. Plants will be delivered January-March 2020. Call us today to place your order as supplies are limited.

Planted in February, ready for sale in June.

Planted in February, ready for sale in July.

CONTAINER TREES NOW AVAILABLE

Installation of B&B Trees and Shrubs

- Dig hole 2 to 3 times wider than the root ball.
- Hole depth should be 2-3 inches less than the root ball depth so the top of root ball is positioned 2-3 inches above finished grade.
 CAUTION: Over digging hole depth and back filling may result in undesired settling.
- Place tree upright in hole and start backfilling with existing soil.
- Remove burlap from the immediate area around trunk.
- Backfill a few inches at a time and water in backfill to remove any air pockets.
- Insure that the root ball is adequately watered before finishing the tree.
- Stake the tree only if on a windy site or severe slope.
- Mulch an area at least six feet in diameter around the plant.
 Do not put over 1 inch of mulch over top of root ball.
- Remove the nylon strapping by the end of the first year.
- Insure that the plant is adequately watered throughout the year.
- Start your fertilization program as the roots become established in the backfill soil.

Terms

PRICES:

This wholesale price list supersedes all previous pricing. Prices are subject to change without notice. The prices enclosed are wholesale only and are F.O.B. Selma, AL. All orders are subject to crop availability and condition.

PAYMENT TERMS:

Cash payment upon receipt of plant material is required of those without established credit. Approved credit customers are net 30 days from date of invoice. Interest of 1.5% will be added to past due accounts (18% per annum).

DEPOSITS:

Orders with a request date of 60 days or more will require a deposit of 25% down. Deposits will be forfeited on orders delayed beyond period of original deposit or will require an additional deposit. Deposit will be prorated as the order is shipped.

DELIVERY:

Delivery and shipping cost are the responsibility of the buyer. Risk or loss passes to the buyer once the plant material is loaded for shipment. Any damaged or loss occurring during shipment is the risk and responsibility of the buyer. Seller will arrange shipping and delivery based on these conditions, unless otherwise instructed. Additional shipping costs may arise if trucks are not unloaded within freight companies allotted time frame. Shipping charges are due upon receipt of goods.

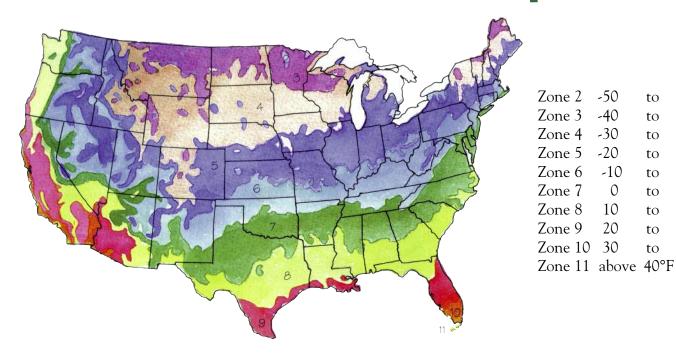

GUARANTEE:

Plantation Tree Company makes no warranty either expressed or implied, except that plants are true to name. If buyer notes a problem upon receipt of shipment, Plantation Tree Company must be informed in writing (fax is sufficient) within 10 working days of shipment. Plantation Tree Company will in no means be responsible for damage caused by weather conditions or buyer/owner neglect. In any case, the limit of liability will not exceed the original invoice value.

SUMMER DIGGING:

Summer digging or out of season digging (mid-April thru October) may be subject to a 15% surcharge of the total orders. The variables which would dictate this additional charge would be watering, spraying, additional curing or holding, etc. Each order will be considered individually.
